

Cornice for the Classic system

Cornice

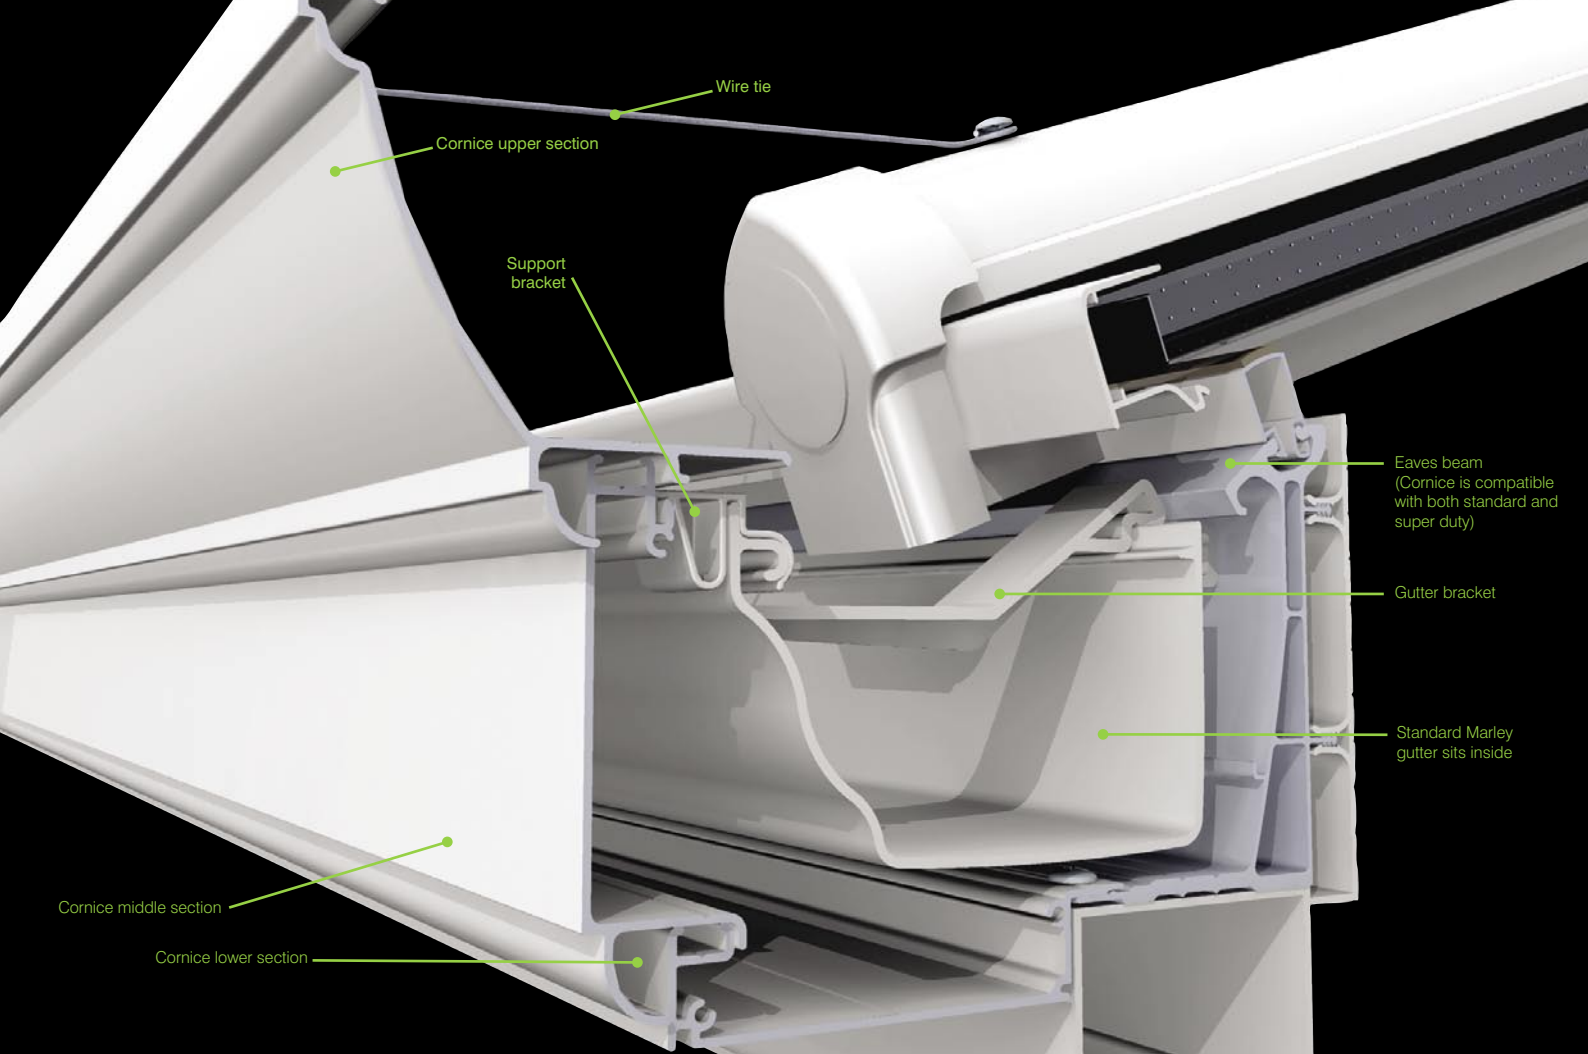

Version: 1.0
May 09

Cornice is the latest in a long line of new products from Ultraframe. Along with other innovations to the Classic roof, our purpose is to offer alternative or upgraded aesthetics to the standard roof. For those seeking the ultimate in upgrade opportunities, the Cornice is it.

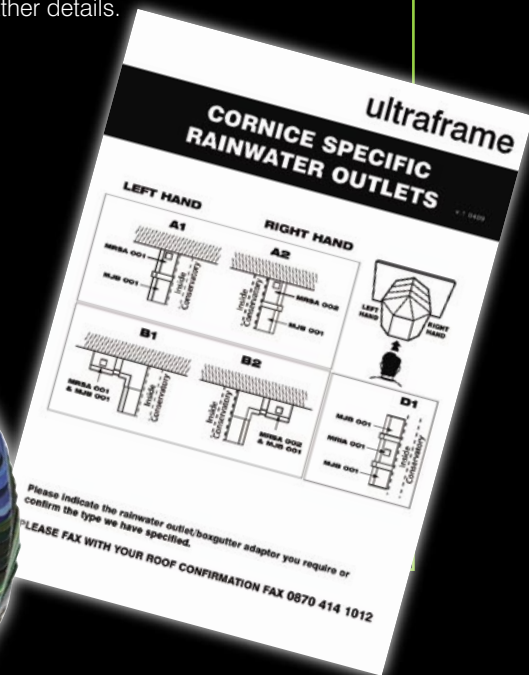

Cornice can be used on either the standard eaves beam or the super duty eaves beam and is assembled in three sections to add a further degree of elegance to the Classic roof. Cornice shrouds the existing Classic gutter, in effect hiding the ends of the glazing bars to provide smooth clean lines at the eaves interface. Naturally you can specify Cornice on all new Classic roofs but you can also retro fit it to existing roofs, providing a further opportunity, if you need it .

Cornice is one important part of a phased introduction throughout 2009 of a full external aluminium suite - we will keep you informed as each stage is revealed.

Ordering information

As you would expect, when you specify Cornice on your next Classic roof order, all the work is done for you. A detailed installation guide is provided as is other information on outlet choices. Cornice can be ordered in an infinite variety of colours and paint finishes - please ask for further details.

Ultraframe is a trading name of Ultraframe (UK) Ltd
